

Invented, innovated and improved.

It's been 50 years since 3M filed the first patent for sun control window films. Since then, millions of square feet of our films have been installed around the world. Along the way, we discovered new technologies allowing us to make our window films stronger, versatile and more effective. Every day we strive to develop films that will help keep you more comfortable, secure and safe.

50
years of
window film
innovation

Worry-free installation.

Our installation partners are 3M trained and certified to ensure the highest commitment to quality and customer service.

Opt for comfort.

Ask your sales representative about the added comfort, style and protection 3M™ Automotive Window Film will provide for you and your vehicle today.

Improve your comfort at
3M.com/WindowFilm.

Maintain vehicle's original appearance

Visibility

Reduces glare so you'll be able to keep your eyes on the road.

Reduce glare

3M™ Automotive Films in action.

3M™ Automotive Window Films help block solar heat, glare and up to 99% of UV rays while letting visible light in.

With 3M™ Automotive Window Film

Without Window Film

Choose your level of protection.

You can choose to maintain your vehicle's appearance or dramatically change it based on your tint preference. Talk to your sales representative about tint options.

The Skin Cancer Foundation recommends the use of window film in automobiles and commercial and residential buildings due to its properties that screen out UV rays.
